

DESKLINE®
IMPROVING ERGONOMICS

Electric height adjustment of kitchens and counters

Baselift™ - Ergonomics meets Innovation

LINAK® 
WE IMPROVE YOUR LIFE

BaseliftTM
Ergonomics meets Innovation

World-class innovation requires the right equipment, right down to the base line

The market trend within the kitchen and retail business is centred around end-users focusing more and more on Ergonomics and Comfort – both at work and in their home lives. This trend has led to a demand for height adjustable solutions that does not compromise the aesthetic design.

LINAK sees kitchens and retail counters as workstations similar to office desks, where adjustment for the individual is a must. The combination of the market trend, our knowledge, expertise and enthusiasm for height adjustable solutions has led to development of the innovative world-class solution Baselift™ system.

The clever move

Stay ahead of the crowd and let Baselift set your kitchen and counters apart for the competition. The Baselift system is very compact. It can be built into the base without interfering with the size of the cabinets. It is also very easy to integrate.

A solid start can make all the difference

Like any foundation, a solid start can make all the difference. The well-constructed Baselift system is multi-parallel and can run with up to 16 units. For optimal stability of your height adjustable kitchen or counter, it is important that you consider the number of Baselifts and the placement of these.

One-person installation

The Baselift is a lifting unit within the LINAK® DESKLINE® product range, where all components work together. The system is easy to mount and can be handled by one service technician only.

True systems where everything fits – **it is simply Plug & Play.**

Scan the QR code and view a short video about mounting the baselift system.

The size and type of kitchen/counter influences the number of Baselifts and the placement of these. Please consult your LINAK sales representative to discuss the optimal solution.

Be 100 mm ahead of the crowd

Baselift is a compact lifting unit with a built-in dimension of only 100 mm. The adjustment range is also 100 mm, which is enough to fit most users in a stand-stand or sit-sit situation.

Baselift™

- Thrust 1500 N
- Speed 14 mm/s
- Built-in 100 mm
- Stroke 100 mm

Control box CBD65

- Compact, lightweight
