

Hand control HL400

The LINAK® hand control HL400 is designed for intuitive control of LINAK actuator systems in long term care applications. HL400 offers the user a simple locking of functions required to ensure safety for patients. With its minimalistic design, it is easy to keep clean with an IPX6 rating and provides a good grip for both left- and right hand users.

The HL400 is compatible with some analogue control boxes and all OpenBus™ control boxes and the functionality can be customised to match market needs.

- **Selective locking of individual rows** for greater flexibility and increased patient safety
- **Immediate overview** of locked and unlocked functions
- **Make it your own:** minimalistic design for easier front cover customization
- **Smooth edges** makes it easier to keep clean with less bacteria build up
- **2 hooks and 1 magnet** for easy attachment to application
