

KA30 PL

LINAK® Patient lift actuator

A powerful, low noise actuator designed for patient lifts and healthcare applications. With up to 8,000 N push load, flexible stroke lengths, IPX6 protection, and Manual lowering, it delivers exceptional safety, hygiene, and performance in a compact, easy-to-integrate design which makes it ideal for safe and comfortable patient transfer.

Key features USP:

- Low noise level
- A small-sized envelope is easier to fit into the application
- A simplified supply chain and fewer Stock Keeping Units (SKUs)

Key features KSF:

- Increased user comfort
- Easy integration into existing and new applications
- Improved safety and functionality
- High hygiene level is important in hospital/ care environment - IPX6
