

Product introduction

LC3 - Lifting columns

LC3 2-stage and 3-stage set the standard for vertical lifting to high-end medical equipment. The LC3 moves very quietly even with substantial load. The columns offer high speed and advanced memory options to ensure easy positioning of e.g. Surgery tables and chairs, X-ray equipment and C-arms. The compact 2-stage or 3-stage are adapted for different application requirements and offer powerful lifting up to 6 kN in push and 4 kN in pull.

	Profile size: 163 x 163 mm	Profile size: 146 x 146 mm	
LC3 3-stage The match for powerful and strong lifting of medical equipment with solid and stable design e.g. Surgery tables			LC3 2-stage The match for slim medical equipment and need for very high dynamic bending moment e.g. C-arms
Dynamic bending moment: Up to 1400 Nm			Dynamic bending moment: Up to 2100 Nm
Improves cable management More than 30 combinations of cables through the column – Hand control, motor cable, mains cable and earthed profile			

High-end medical equipment:

Quiet. Safe. Powerful.
