

# LIFT50™

BAL50 from LINAK® – the battery design of the future

## Vented

Sealed enclosures with controlled venting for overpressure relief - surges are blocked by unique output arrestors to ensure enclosure integrity

## Isolated

Adjacent batteries are isolated from each other to stop propagation to other cells

## Protected

Electronic protection against short circuit, overcharge, over voltage, excessive draw and under/over temperatures

Efficient Li-Ion battery

Unique design and simplicity

Optimized user experience

Efficient Li-Ion battery – Good ROI

VIP battery design

3 channels

Up to 5 channels w. PJ2

Readily available emergency stop

One-hand battery release

IPX6 enclosure

APP - Product Status Display

Redundant controls

OpenBus™ inside  
SoftCon2™ ready  
Advanced SWL
