

Product introduction

MJB5 Plus - Modular Junction Box

The MJB5 Plus is a modular junction box designed to be used with LINAK® OpenBus™ control boxes. This box makes it possible to connect multiple hand controls or attendant controls with your actuator system. You can also use the MJB5 Plus as a charger, or to connect Under Bed Light and other third-party products. Furthermore, this compact box is easy to integrate in a wide range of healthcare applications, such as hospital beds, surgery tables-, and treatment chairs. With the new AOC version, it has never been easier to add third party products and own products like multi-purpose foot switches to the application.

Innovative bracket solution

Quick and easy mounting on the control box

New cable-locking mechanism

Easy locking and unlocking

New AOC version

Easy connection of own products or third party products to the application

IPX6 Washable DURA™

Ready for machine washing and high-pressure washdown

Beds

Treatment chairs

Surgery chairs

The possibilities are endless
