Focus on Pergolas
When partnering with LINAK® you get more than just a product in your hands. It is our goal to create added value to our customers by offering innovative solutions, extensive knowledge, world-class production and global presence.

Opening and closing
Simple actuator movement for opening and closing the pergola blinds
Understanding your needs

From small domestic pergolas to larger public pergola systems, LINAK® offers you high-quality electric actuator solutions - making your pergola system easy to use.

When your customers step into their pergola they look for easy regulation of the shading in order to increase comfort and wellbeing.

System solutions from LINAK TECHLINE® are userfriendly and fit for use in various weather conditions. Come snow, rain or sun, you can rely on the LINAK actuator to do the job.

With many years of experience, LINAK is an excellent choice when considering linear electric actuator solutions for optimal adjustment of pergola blinds.

**So what can LINAK offer you:**
- Maintenance-free products that can withstand extreme weather conditions
- Low noise level
- Low power consumption
- Actuators that are easy and fast to operate by means of remote controls, app or switches
- Easy to install actuator solution that fits immediately into your application
- Precise positioning and accurate variable control over acceleration and velocity

**LINAK as your partner**
We do not want to be merely another supplier to our customers. We want to be your partner.

It is important to us that your pergolas work relentlessly in all situations. All our actuators have been put through extensive testing so you can rest assured that your TECHLINE actuator solutions will do the job no matter what.

Furthermore, all members of the TECHLINE team of engineers and consultants have vast product and application expertise.

“With many years of experience, LINAK is an excellent choice when considering linear electric actuator solutions for optimal adjustment of pergola blinds.”

LINAK offers service worldwide

Explore the rich technology behind actuators

At the Actuator Academy™, you will find a library of videos and information about actuator components, actuator testing, and intelligent actuator control.

Find out what you should expect of a good industrial actuator, what affects its performance and efficiency, and how to best utilise your linear motion actuator.

We hope to inspire you and ultimately make you wiser on the moving electric revolution we are all part of.

Happy exploring!

Check out the Actuator Academy

Enhance the value and performance of your application with the intelligent movement of IC actuators.
LINAK® actuators with Integrated Controllers (IC) present you with various feedback outputs, smart actuator control, customisation, and monitoring possibilities.

IC actuators unlock the benefits of a true Plug & Play™ solution, making external control boxes and relays superfluous and reducing the wiring complexity.

A comprehensive testing programme ensures that the integrated electronics are well protected for use in tough environments.

If you are looking for a movement solution that will help you stay competitive in the future, then go for LINAK actuators with integrated controller, and Move for the Future.

For pergolas, actuators with IC provide intelligent and cost-effective performance:

- Simple installation with built-in electronics.
- Precise control of actuator movement
- Feedback and movement customisation
- On-site configuration
- Easy actuator status monitoring

For more information on IC, please visit LINAK.COM or scan the QR code.
LINAK® industrial actuators offer a versatile array of movement solutions for pergolas.

With **thrusts up to 15,000 N, max speeds up to 160 mm/s, and strokes between 20 and 999 mm**, the actuators are highly adaptable for a wide variety of applications.

Industrial actuators with **heavy-duty aluminium housings** are very suitable for use in corrosive environments. Having been thoroughly salt spray and chemical resistance tested and approved for ratings up to **IP66 and IP69K static**, these actuators will work reliably for years, even when exposed to salt, water, wind, and sun.

**Operating temperatures between -40°C to +85°C** make them fit for work in numerous settings.

By using an integrated controller, industrial actuators are **configurable** and offer **relative or absolute position feedback** as well as **performance monitoring**.
TECHLINE® system solutions improve functionality and add value to your application.

Our systems offer:
- Choose your own unique control solution
- Easy integration into your application
- Time saving installation
- Possibility of running up to two applications at a time with simultaneous run

Actuator
Add one or two actuators. Choose between LA14 IC™, LA23 IC or LA25 IC

Control options
Signal cable with open leads for your selected controls

OR
LINAK controls:
- Hand control (HB)
- Remote control (RF)
- Desk panel (DP)

Robust and powerful
LINAK® products are reliable products, made to last! High quality is the trademark of LINAK, and an element of the highest importance to us.
Resting on the pillars of the LINAK values
Strategic partnerships within R&D, after-sales, logistics, marketing and manufacturing

Meaningful value by converting great new ideas into solutions of tomorrow

Process automation built on newest technology and run by LEAN principles

Updated market insights and local support offered to every customer

In-depth knowledge of the market and the market trends makes LINAK a true solutions provider.
Testing programme

In each industrial application, the actuator is just one component of many, but at LINAK® we fully appreciate that it is of utmost importance to you and your customers. Not a single actuator leaves the factory until it has undergone a 100% function test.

Depending on the actuator type, various tests have been carried through. Please consult your local LINAK office or take a look at the actuator data sheet in question to get a thorough test overview.

This is your guarantee that a solution based on LINAK TECHLINE electric actuator systems is a solution that will work reliably for years and years.

“Our actuators must never malfunction. Therefore, it is important that all our products are tested inside and out, and to the extreme in a wide range of tests.”

- Claus H. Sørensen, Director R&D

Climatic tests:
In the climatic test the actuators are tested to operate in extreme temperatures as well as to endure rapid changes in temperature. In a dunk test, the actuators have to withstand repeating temperature fluctuations between +85°C to -40°C and still maintain full functionality and ingress protection.

- EN60529-IP6X - Dust
- EN60529-IPX6 - Water
- ISO16750- IP69K - High pressure cleaning
- IEC60068-2-3 - Moisture storage
- IEC60068-2-30 - Operation in moisture
- ISO16750-4:2010 - Dunk test
- EN60068-2-52 - Salt spray
- BS7691 Section 6.11.2.4 - Chemicals
**Electrical tests:**
All electrical parts are tested i.e. power supply, power and signals cables, control signals etc. Electrical immunity is tested according to industrial standards i.e. for radio noise, electrical discharge and burst.*

- **EN/IEC 61000-6-4** - Generic standard emission industry
- **EN/IEC 60204** - Electrical equipment of machinery
- **EN 50121-3-2** - Railway applications - Rolling stock apparatus
- **94/25/EC** - Recreational crafts directive
- **EN/ISO 13766** - Earth moving machinery
- **EN/IEC 61000-6-2** - Generic standard immunity industry
- **2004/104/EC** - Automotive Directive
- **EN/ISO 14982** - Agricultural and forestry machines
- **EN/ISO 13309** - Construction machinery

* These tests do not apply to third party products!

**Mechanical tests:**
**Vibration:** The actuator must withstand continuous vibration in three directions.

**Shock:** The shock test puts the actuator through 3 shocks of up to 50 G in each of six directions.

**Bump:** The actuator receives bumps of up to 30 G in each of six directions several hundred times.

- **EN60068-2-64 (Fh)** - Random vibration
- **EN60068-2-27 (Ea)** - Shock
- **EN60068-2-29 (Eb)** - Bump
