

# UBL3 - Under Bed Light

**March 2022**

The new UBL3 Under Bed Light from LINAK® was developed specifically for beds within hospitals, nursing homes and in homecare. A new accessory for the LINAK OpenBus™ platform, the UBL3 is activated by the Out Of Bed function and provides patients and caregivers with a reliable light source that improves safety during evening hours or when main room lights are not in use. Read on for more details on the UBL3 and how it can help improve the safety of your application.

## OpenBus™ version with microprocessor

A new accessory in the OpenBus family, it addresses an important market feature request.

## Software controlled light intensity

Available in different light intensities, based on user needs.

## Compact design and simple mounting

The light is compact and mounts easily to the underside of the bed with just two screws.

## OpenBus 1.1

Improving safety for both patients and caregivers, the UBL3 is activated by the Out of Bed function.

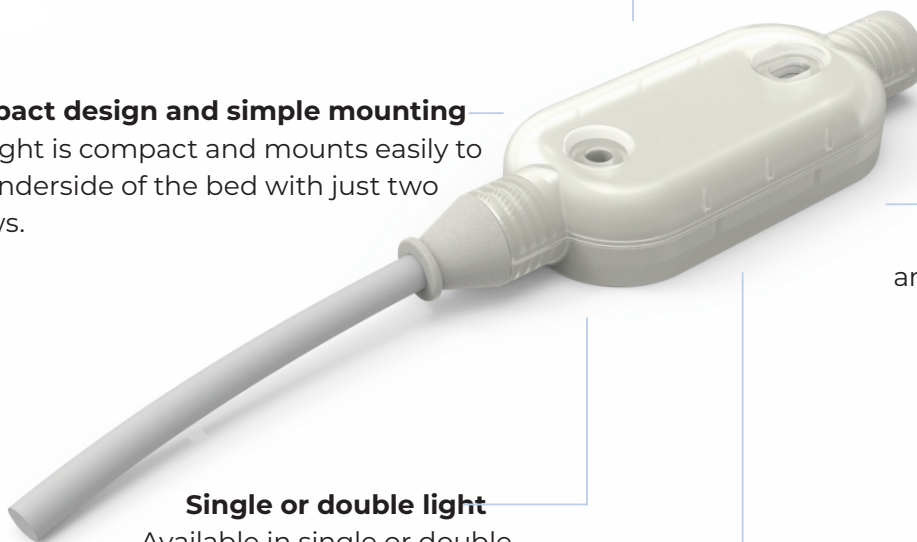

## Single or double light

Available in single or double light configurations based on lighting needs.

## IPX4\* Housing

IPX4 housing makes the product easy to clean and sanitize.

\*Currently IPX4, IPX6 coming soon.

## Target Applications:
