

Bed Control IoT App Data sheet

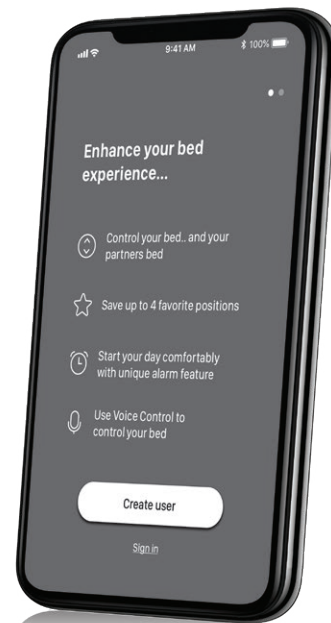

Bed Control IoT App

The Bed Control IoT App is developed for adjustment of leisure beds equipped with LINAK® actuator systems (TD4/ TD5 or LA18 Advanced) using Bluetooth® Low Energy (BLE) and Wi-Fi connectivity (for voice control).

The app is built on the foundation of the LINAK Bed Control App but is expanded with features to support the WiFi2LIN box and voice control.

An onboarding flow will help the users get started and connect their bed to Wi-Fi via the WiFi2LIN box. The WiFi2LIN box supports voice control services, such as Amazon Alexa or Google Assistant, and makes them part of the users' smart home. In the app, it is possible for the user to be linked to the voice control services available, as well as change and control the network settings for the bed.

The Bed Control IoT App is sold only in customised versions to reflect your brand and will not be launched in the LINAK app stores.

Features:

Bed Control IoT features

- User account set-up
- Bed connection to Wi-Fi
- Bed connection to voice control services (Google Assistant and/or Amazon Alexa)
- Change of Wi-Fi settings

Common features for Bed Control App and Bed Control IoT App
