

DPI1K Data Sheet

With a streamlined, contemporary design and built-in anti-collision sensor, the Desk Panel DPI1K meets all needs for a basic desk panel. Up and down drive of the office desk is easily performed by tilting the panel in the requested direction making it unnecessary to look at the panel while using it. The built-in sensor-based anti-collision solution limits material damage to a desk or an object if a collision occurs during driving of the desk. Detects tilting as well as collision with both hard and soft obstacles.

Features/Usage

Features

- Intuitive desk panel for simple up and down drive
- Built-in sensor-based anti-collision solution minimising the risk of damage to a desk caused by squeezing or blocking of obstacles in up and down direction
