LINAK[®] INFORMATION ABOUT EU Directive 2011/65/EU and Directive 2015/863 (RoHS)

To LINAK customers

EU Directive 2011/65/EU restricts the use of 6 substances: Lead, Mercury, Hexavalent chromium, Polybrominated biphenyls, and Polybrominated diphenyl ether are all restricted to a maximum concentration of 1000 ppm. Cadmium is restricted to a maximum concentration level of 100 ppm.

LINAK confirms that our products are in compliance with the EU RoHS directive 2011/65/EU. Some LINAK products might contain one of the restricted substances above the threshold, but these instances are covered by valid exemptions listed in Annex III.

On 31 March 2015, Directive 2011/65/EU was amended by Directive 2015/863. Directive 2015/863 further restricts the use of four phthalates: DEHP, BBP, DBP, and DIBP to a maximum concentration of 1000 ppm. The amendment will be in force from 22 July 2019 for electronic devices, except for medical equipment. Medical equipment is in scope from 22 July 2021.

LINAK products will not contain any of the restricted substances above the threshold as per the aforementioned deadlines.

LINAK will monitor changes in the RoHS directive closely and update our products and documentation accordingly.

Best regards
Arne Pihl Iversen
