

DESKLINE®  
Desk2Device USB Charger

[LINAk-US.COM/DESKLINE](http://LINAk-US.COM/DESKLINE)

**LINAk**®   
WE IMPROVE YOUR LIFE

# Sorry power outlet, we won't be needing you.

## Now you can charge devices directly from your desk.

### Powered by LINAК®

The LINAК Desk2Device USB charger is a unique device that draws power directly from the LINAК control box. Connected to the control box by an advanced proprietary LINAК system, the device helps remove the clutter of an additional power cord for users.

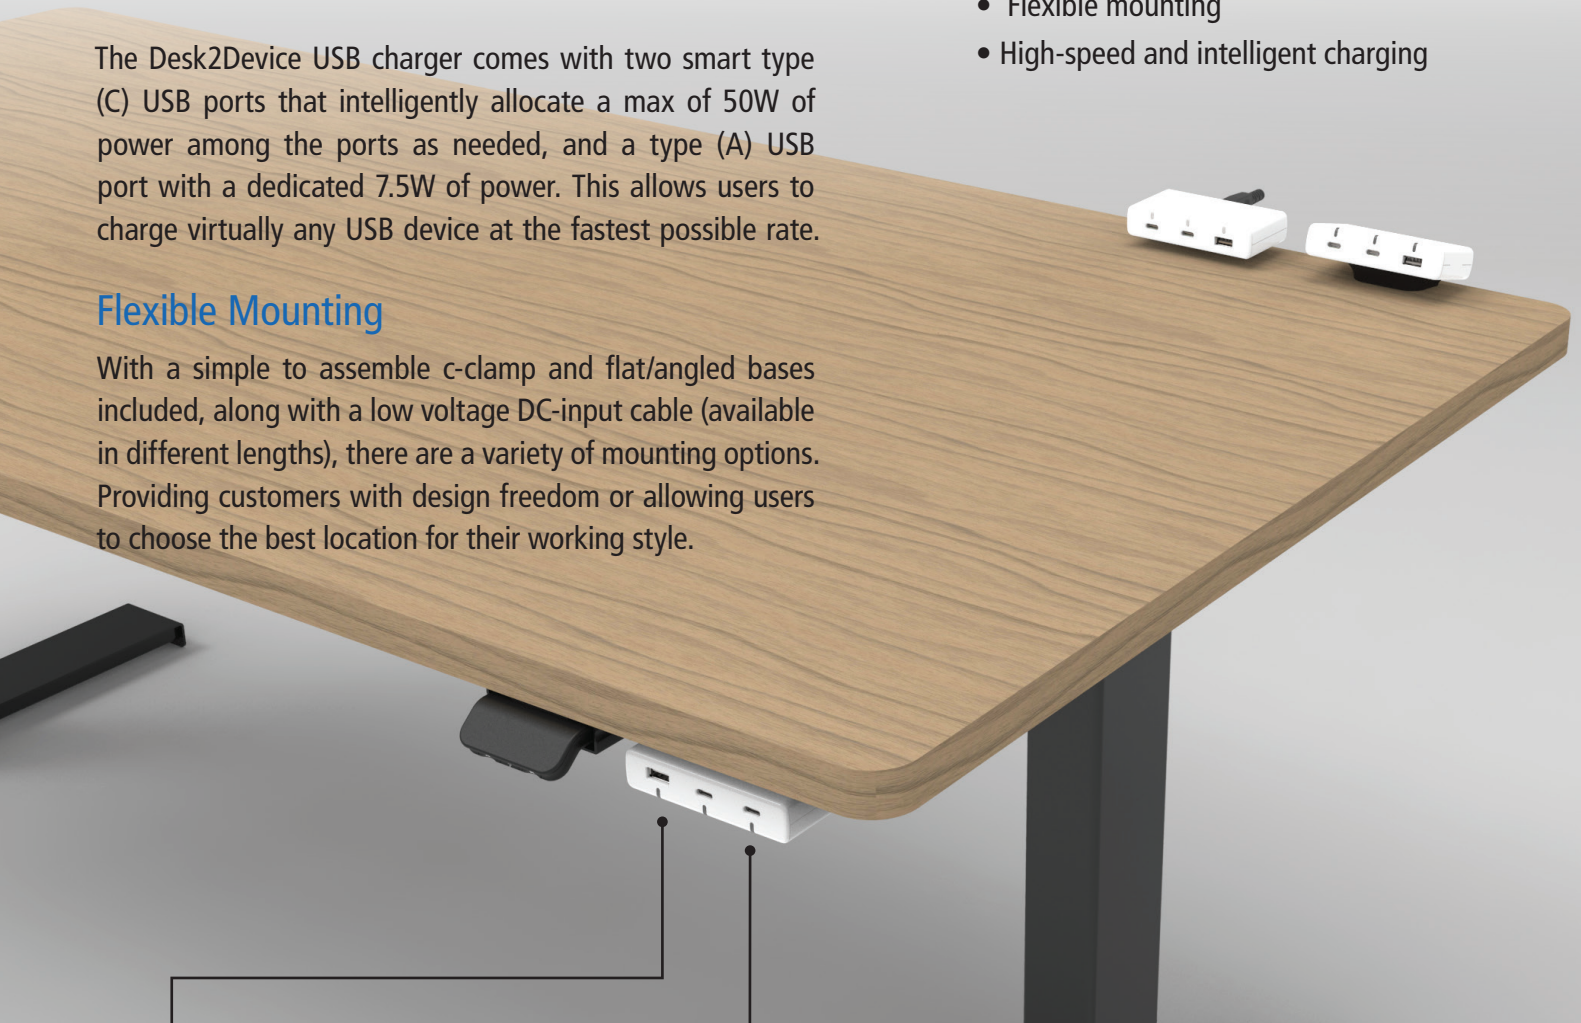

The Desk2Device USB charger comes with two smart type (C) USB ports that intelligently allocate a max of 50W of power among the ports as needed, and a type (A) USB port with a dedicated 7.5W of power. This allows users to charge virtually any USB device at the fastest possible rate.

### Flexible Mounting

With a simple to assemble c-clamp and flat/angled bases included, along with a low voltage DC-input cable (available in different lengths), there are a variety of mounting options. Providing customers with design freedom or allowing users to choose the best location for their working style.

### Benefits

- Elegant and sleek design
- No additional power outlet needed
- Charging indicator lights
- Works with virtually any USB device
- Flexible mounting
- High-speed and intelligent charging
