Flange mounting bracket
User manual
Preface

Dear User,

We are delighted that you have chosen a product from LINAK®. LINAK systems are high-tech products based on many years of experience in the manufacture and development of actuators, electric control boxes, controls, and chargers.

This user manual does not address the end-user, but is intended as a source of information for the manufacturer of the equipment or system only, and it will tell you how to install, use and maintain your LINAK electronics. It is the responsibility of the manufacturer of the end-use product to provide a User Manual where relevant safety information from this manual is passed on to the end-user.

We are sure that your LINAK product/system will give you many years of problem-free operation. Before our products leave the factory they undergo full function and quality testing. Should you nevertheless experience problems with your LINAK product/system, you are always welcome to contact your local dealer. LINAK subsidiaries and some distributors situated all over the world have authorised service centres, which are always ready to help you.

LINAK provides a warranty on all its products. This warranty, however, is subject to correct use in accordance with the specifications, maintenance being done correctly and any repairs being carried out at a service centre, which is authorised to repair LINAK products. Changes in installation and use of LINAK products/systems can affect their operation and durability. The products are not to be opened by unauthorised personnel.

The User Manual has been written based on our present technical knowledge. We are constantly working on updating the information and we therefore reserve the right to carry out technical modifications.

LINAK A/S
LINAK application policy

The purpose of the application policy is to define areas of responsibilities in relation to applying a LINAK product defined as hardware, software, technical advice, etc. related to an existing or a new customer application.

LINAK products as defined above are applicable for a wide range of applications within Medical, Furniture, Desk, and Industry areas. Yet, LINAK cannot know all the conditions under which LINAK products will be installed, used, and operated, as each individual application is unique.

The suitability and functionality of the LINAK product and its performance under varying conditions (application, vibration, load, humidity, temperature, frequency, etc.) can only be verified by testing, and shall ultimately be the responsibility of the LINAK customer using any LINAK product.

LINAK shall be responsible solely that LINAK products comply with the specifications set out by LINAK and it shall be the responsibility of the LINAK customer to ensure that the specific LINAK product can be used for the application in question.
Chapter 1

⚠️ Safety instructions

Please read this safety information carefully:

Be aware of the following three symbols throughout the user manual:

⚠️ Warning!
Failing to follow these instructions can cause accidents resulting in serious personal injury.

⚠️ Recommendations
Failing to follow these instructions can result in the actuator suffering damage or being ruined.

ℹ️ Additional information
Usage tips or additional information that is important in connection with the use of the actuator.

Furthermore, ensure that all staff who are to connect, mount, or use the actuator are in possession of the necessary information and that they have access to this user manual.

Persons who do not have the necessary experience or knowledge of the product/products must not use the product/products. Besides, persons with reduced physical or mental abilities must not use the product/products, unless they are under surveillance or they have been thoroughly instructed in the use of the apparatus by a person who is responsible for the safety of these persons.

Moreover, children must be under surveillance to ensure that they do not play with the product.

Before you start mounting/dismounting, ensure that the following points are observed:
• The actuator to be mounted is not in operation.
• The bracket is free from loads that could be released during this work.

Before you put the actuator into operation, check the following:
• The bracket is correctly mounted as indicated in the relevant user instructions.
• The equipment can be freely moved over the actuator’s whole working area.

During operation, please be aware of the following:
• Only use the bracket within the specified working limits.

When the equipment is not in use:
• Check the bolts regularly to ensure the bolts are probably tightened.

⚠️ Recommendations

• The flange mounting bracket is designed for supporting forces up to 10,000N push/pull
• If irregularities are observed, the bracket must be replaced
• Make sure to have the specific actuator user manual ready when mounting the bracket.
Chapter 2

Mounting guidelines
LINAK® flange mounting bracket is quickly and easily mounted with few steps.

Parts:
1 Bars: 4 pcs
2 Top plate: 1 pcs
3 Middle plate: 1pcs *
4 Bottom plate: 1 pcs **
5 Bag with screws: 1 pcs
   A. 8 pcs screw M8x40 A2 ISO14581
   B. 4 pcs screw M5x10 A2 ISO4027
   C. 2 pcs NUT M16x1.5 A2 DIN934
   D. 2 pcs SPACER M16 A2 DIN125A

* The middle plate is an option for the flange mounting bracket, thus it is not always in the packet.
** Can vary from the picture.

Tools:
2.5 Allen Key
Screw driver TX 45
Wrench 24 mm
## Mounting of the bracket

### Step 1:
Jump this step if:
You are not mounting the middle plate in the bracket.

Mount the four screws B loosely in the middle plate, and insert the four bars.

### Step 2:
Mount the four bars with the bottom plate, using four screws A loosely.

### Step 3:
Slide the top plate over the threaded back fixture, with the nuts C and spacer D placed as shown.
**Step 4:**
Mount the top plate with four bars. Then tighten the nuts on the back fixture loosely around the top plate.

**Step 5:**
Adjust the actuator inside the bracket into a suitable position, then tighten the middle plate using a screwdriver with 45 torque.
**Step 6:**
Tighten the bars completely to the top and bottom plates.

It is recommended that final adjustment of nut C is done when the bracket and actuator is mounted on the application.

The nuts C are to be tightened with a screwdriver with 45 torque after the bracket is mounted on the application.

---

**Final result**

Chapter 3

Specifications

Surface treatment: Stainless steel AISI 304

The bracket is designed for actuator thrust up to 10,000N push/pull. A long actuator backfixture is required in order to adjust the position of the actuator in the bracket.

Usage:
- The bracket is compatible with various actuators.

Dimensions

Bracket:

Top plate:
The middle plate is optional, it is compatible with the actuator LA36.

The bracket fits with these standards in regards to the interface. However we do not comply to the complete standard. The bracket interface dimensions are in accordance with the industry standards ISO 5210 and ISO 5211, and it fits with the flange types F07 and F10. The International Standards specifies requirements for the attachment of actuators to industrial valves.

**Chosen item number:** FMB11010450

* The bracket interface dimensions are in accordance with the industry standards ISO 5210 and ISO 5211, and it fits with the flange types F07 and F10.

All brackets are delivered with stainless steel screws for bracket assembly and actuator mounting into the bracket.
Chapter 4

Maintenance

- We recommend to check the bolts regularly to ensure the bolts are probably tightened.

Repair

If there is a need for repairs, make sure to check the mounting guidelines for correct assembling.

Main groups of disposal

LINAK’s products may be disposed of, possibly by dividing them into different waste groups for recycling or combustion.

<table>
<thead>
<tr>
<th>Product</th>

</table>

We recommend that our product is disassembled as much as possible at the disposal and that you try to recycle it.

Warranty

There is an 18 months’ warranty on TECHLINE products against manufacturing faults calculated from the production date of the individual products. LINAK’s warranty is only valid in so far as the equipment has been used and maintained correctly and has not been tampered with. Furthermore, the bracket must not be exposed to violent treatment. In the event of this, the warranty will be ineffective/invalid. For further details, please see standard terms of sale and delivery for LINAK A/S.

Note:

Make sure to only authorised LINAK® products in the bracket. In case the bracket is repaired with unauthorised LINAK® products, the warranty will be invalid.
